

Initial Evidence Register

The starter inventory supplied at incident creation. It tells the app what exists, what is missing, and what requires preservation without providing the later evidence itself.

Document ID	Incident	Record type	Status
R3-START-003	R3 carrier beam - 10/14/2024	Application test evidence	Synthetic / controlled

Evidence status at submission

Evidence ID	Item	Known holder / source	Starter status
EV-001	Preliminary incident notification	Safety reporting system	Available
EV-002	Incident narrative and entity list	Safety reporting system	Available
EV-003	Mechanical assembly drawing	Engineering / document control	Request
EV-004	Energy Control Plan	Maintenance / energy-isolation lead	Request
EV-005	Executed lockout verification	Group lockout records	Request
EV-006	Shift turnover log	Operations / maintenance	Request
EV-007	Outage work scope and task sequence	Planner / work management	Request
EV-008	JJHAC / JSHA	Contractor supervisor	Request
EV-009	Witness statements	Investigation team	Request
EV-010	Crane activity log	Crane operations	Request
EV-011	Hydraulic status / bleed verification	Maintenance	Request
EV-012	Original scene photographs and measurements	Investigation team	Request
EV-013	Post-event mechanical inspection	Reliability / engineering	Request
EV-014	Other-stand comparison inspection	Maintenance	Request
EV-015	Scaffold inspection and occupancy	Contractor / scaffold competent person	Request
EV-016	Crew qualifications and training	Contractor / site onboarding	Request
EV-017	Preserved video and review notes	Security / operations	Request
EV-018	OEM design clarification	Engineering / OEM	Not yet available

Preservation notes

- Preserve original files and metadata; derived summaries do not replace originals.
- Record who supplied each later document and when it was added.
- If two records disagree, retain both and open a contradiction instead of overwriting either fact.
